**Organization:** This course will be given in English with some details translated into French. The aim is to give MD's and DO's who were not able to attend our last "Brain Course" (in Paris) to do so for the first time, or to participate again. This Course has no prerequisites, and is open to both MD-DO's and NP-DO's (Non-Physician DO's).

The Friday session (9h-17h) will be intense but fascinating, while the Saturday and Sunday sessions are morning-only, allowing Course participants the opportunity to explore the wonderful city of Antwerp.

**Program:** *NB Please review the anatomy of the brain in preparation for this Course.* In this Course, participants will discover how to use the cortex to treat lesions of the periphery, as well as to understand how such lesions are palpable at the level of the cortex. This program is ambitious, but Dr. Bensoussan will do his best to lead participants as far as possible.

**Lodging:** We have arranged for a special group rate of €89 (breakfast included) at the Antwerp Crowne Plaza. There are 20 rooms available, but these must be reserved by October 6th; otherwise the price goes up. :-). Arrival on Thursday, December 6th is recommended.

To book, please contact the hotel directly with a credit card number.  
This can be done by phone or via an email to [nele.geboers@cpantwerp.com](mailto:nele.geboers@cpantwerp.com).
